

FLEA TREATMENT NOTICE!!

From Bugaboo Pest Control, LLC
Your residence is scheduled for treatment of fleas

**PLEASE READ THE FOLLOWING INFORMATION.
YOUR COOPERATION IS APRECIATED.**

The bugaboo man is going to treat all the carpeted areas with low-odorously environmentally approved EPA material.

You are required to leave your residence for 2 hours while the material dries.

After you return in two hours, it will be safe for pets and children to be there.

We use a combination of Pyrethrin and an Insect Growth Regulator based products (Nylar Carpet Spray Linalool / Permethrin EPA #4758-169-57076)

How does it work?

It kills fleas on contact. The IGR (insect growth regulator) is used to control the growth and development of eggs.

WHAT YOU MUST DO!!!!

- 1. Remove all personal items from the floor such as clothing, toys, newspapers, etc.**
- 2. Vacuum all carpets thoroughly.**
- 3. Clean and mop all hard surface floors.**
- 4. Leave and remove out of your home for 2 hours.**

YOU DO NOT NEED TO:

- 1. YOU DO NOT NEED TO COVER COUNTERS, FURNITURE OR BEDDING.**
- 2. YOU DO NOT NEED TO WASH counters or utensils**
- 3. (We use no foggers in this process. Only the floor areas will be treated)**
